

MONOBLOC 350 AWNINGS

MONOBLOC 350 AWNINGS

SIMPLICITY AND STYLE

- This is an awning from the invisible arm range featuring the Monobloc system, a self-bearing square bar which enables the awning to cover large areas simply and effectively.
- Lacquer in accordance with QUALICOAT standards
- Stainless steel screws and bolts
- The system is made primarily out of aluminium, which is used in the frame of the awning. Aluminium provides strength, has a long lifespan and is easy to use.
- LLAZA systems are manufactured with top quality materials and are the result of significant research and development efforts.

LLAZA-ART SYSTEM arms provide optimal internal transmission of tension.

- Flat, flexible belt which makes the awning stronger, more resistant, more durable and more aesthetically pleasing than traditional transmission systems.
- The pieces of the arms are assembled before they are sent off to be lacquered in order to protect the joints and to make them more pleasing to the eye.
- The shape of the arms and their configuration when mounted helps to keep the fabric from rubbing on the elbow joints when the awning is opened or closed.
- The use of a belt keeps the lacquer on the arms from being rubbed off as commonly happens with cable and chain systems.
- Under normal use the arms will exceed 60,000 operational cycles.
