New Zealand's Premium Retractable Roof System

[www.Oztech.co.nz](http://www.Oztech.co.nz)

# Our STORY

Oztech was started in Australia in 2001 as an innovative business offering a wide range of retractable roofs, awnings and pergola shade solutions . We transform outdoor areas to create beautiful and practical outdoor living options all year round.

With W.Wiggins, we have created an excellent distribution network of local businesses to cover New Zealand. They offer great service and expertise to create the best solution for your outdoor area .

With 10 years of experience installing over 1000 Oztech retractable roofs across New Zealand. Oztech and our installation teams have created stunning and practical outdoor spaces across New Zealand's diverse landscape and climate. Standing up to all kinds of harsh weather.

With a 5 year system warranty and 10 fabric warranty, you can relax and trust the system is built to last with minimal maintenance. Our friendly and knowledgeable install teams are also ready to help with any questions or support.

Manufactured in Australia, we use the best quality materials, components and abide to strict quality control measures.

Sealed spigots, gutters and rafters do not let a drop  
of rain in

Internal gutter  
Large trough and downpipes allows for minimal  
outlets

Unique seal system  
Our double seal system prevents water overflow

# Our PROCESS

1

## Project Consultation

Our retailers will meet with you to understand your idea and what you want most for the area. They will walk through the space, measure and discuss ideas, offering advice to make sure you are fully satisfied with the final outcome.

The retailer will also be able to answer any questions, provide colour options and samples to further help refine what you are after and how the process of having an Oztech installation process works.

2

## Creating the design and supporting information

Our local retailer will take all the information gained from the consultation and provide a detailed quote for the project. To support the quote and bring the project to life a 3D design of the Oztech in location can be created. This can be very valuable to visualise the space, and understand how the space will work.

3

## Oztech system installation

Once the project has been approved and all engineering and council approvals have been checked and processed, we will order the Oztech to be made in our Australian factory precisely to the area's measurements.

Our trusted local installation team will then work with builders and electricians or other subcontractors to build and install the Oztech. Making any last adjustments to ensure you are completely happy with the final outcome.

4

## After sale support and maintenance

One of the best things about Oztech is the robust engineering and clever design makes for hardly any maintenance. However, if you need anything our local Oztech retailer will be able to assist you in any way.

# Our INSTALLATION STORIES

## Pt Chevalier, Resort-like poolside extension

A stunning extension to this family home in Point Chevalier needed some final touches to really maximise the use of the back deck. The family needed covered space for outdoor lounging and dining.

We designed a large Oztech roof, which suits the house's modern extension, while adding vital outdoor living, for kids and adults alike.

Part way through the project our customer had the opportunity to get diggers in to install a pool and we were able to modify our design to make the extended area work for them.

Having the new outdoor rooms makes for far more comfortable outdoor living and has cooled the interior too, with our customer noting they no longer need to pull all the blinds to escape the afternoon sun.

## Grey Lynn, Lush year round usable space

Our customers had initially planned a louvre system as part of a major renovation project. After finding out about the Oztech Retractable Pergola, they were keen to get our ideas to create a flexible space to use year-round. Another of their concerns was the Summer sun making the kitchen island almost unbearable.

We solutioned a split system, with two independently operable roofs over the outdoor lounging and dining spaces. Clear blinds all around and a special shade blind for the dining spot make for a very usable space.

Being able to close only the roof over the outdoor dining area allows the family to have more light in the house if they want, but still dine out under cover, giving them total flexibility. Now the family don't have to worry about closing doors when it rains and the kids can run around under cover outside.

With the new shade the kitchen is also a much more pleasant place to be.

*With hundreds of other successful installations stories to match*

# Our GALLERY

Our Oztech systems unique and customizable profiles perfectly enhance any outdoor space, without impeding views or light. The wide range of colours, styles and fittings can perfectly match any style home or business. Make full use of your outdoor space Day or night and any season.
